n*n 的九九乘法表與四則運算

學號: 4B3G0123 姓名: 黃正豪

Github: https://github.com/maogualaedu/four-arithmetic-operation-and-n-n-multiplication-.git

程式碼:

說明:

設 a 與 b 兩整數,以及設字元 symbol;symbol 回傳字元給函式 index()中的字元 sy 判斷使用哪一個四則運算符號,而整數 ab 則回傳給 index()中的 xy 去做計算加減乘除。如果在除法判斷除數為 0,也就是 y 為 0 的話,會輸出為 error;如果在乘法中被乘數 x 與乘數 y 相同時,也就是被乘數 a 與乘數 b 相同時,就會輸出九九乘法表。

程式執行結果:

```
PS D:\cpp\vscode-cpp\Four arithmetic operations&k multiplication nxn> ^C
PS D:\cpp\vscode-cpp\Four arithmetic operations&k multiplication nxn> ^C
PS D:\cpp\vscode-cpp\Four arithmetic operations&k multiplication nxn> & 'C
PS D:\cpp\vscode-cpp\Four arithmetic operations&k multiplication nxn> & 'C
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS

PS D:\cpp\vscode-cpp\Four arithmetic operations&k multiplication nxn> & 'C
